

# Examiner-Initiated Interview Summary

Application No.

10/050,680

Applicant(s)

PECORINI ET AL.

Examiner

Callie E. Shosho

Art Unit

1714

## All Participants:

(1) Callie E. Shosho.

(2) James Proscia.

Status of Application: Allowed

(3) \_\_\_\_\_

(4) \_\_\_\_\_

Date of Interview: 16 November 2004

Time: \_\_\_\_\_

## Type of Interview:

- ☒ Telephonic  
☐ Video Conference  
☐ Personal (Copy given to: ☐ Applicant ☐ Applicant's representative)

Exhibit Shown or Demonstrated: ☐ Yes ☐ No  
If Yes, provide a brief description:

## Part I.

Rejection(s) discussed:

Claims discussed:

19,21

Prior art documents discussed:

## Part II.

SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:  
*See Continuation Sheet*

## Part III.

- ☒ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability. *Part II above.*  
☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

(Examiner/SPE Signature)

(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed:

The examiner's amendment was agreed to and authorized by Mr. Proscia.

The amendment to claim 19 was made to clarify that it is the concentrate comprising the copolymer and the colorant that is added to the polyester and that it is the concentrate, not the copolymer, that does not comprise a low melt viscosity resin. The amendment to claim 21 was made in light of applicants comments on page 8 of the amendment filed 9/13/04 that new claim 21 corresponds to present claim 4 written in independent form. As seen from claim 4, in the polyester composition, the concentrate is added to a base polyester not a base polymer.
